PROJECTS

ERP Management Software

- As a part of dynamic software development initiative, led the creation of an innovative ERP Management software featuring a cutting-edge-cloud-based dashboard. This project aimed to provide businesses with a tailored solution to enhance their workflow management.
- Streamlined workflow management.

- Developed a high personalized dashboard for each client , recognizing the unique workflow requirements of different businesses.
- Cloud infrastructure implementation.
- Real-time analytics and insights.
- user-centric-design.
- Developed role-based access control to maintain data security and privacy across different user hierarchies.
- Designed and implemented customized dashboards tailored to individual client requirements, ensuring personalized user experiences.

Stem-xpert Nurture Innovation

- A robust software solution with modules for courses, schools, classes, and content, designed to streamline educational management and delivery while promoting problemsolving, critical thinking, and creativity through project-based learning.
- Partner with STEM-Xpert to influence STEM education, access cutting-edge resources, and unlock earning potential through a proven business model, strategic marketing, and impactful campaigns at various operational levels.
- Mentor and support affiliate marketers and partners, fostering their success while expanding your own opportunities within a network dedicated to revolutionizing STEM education.

Responsibilities

- Using **Redux-toolkit** for state management.
- **Minimal UI** is used for UI development and it is a fully responsive and premium bootstrap dashboard template including dark, light themes and RTL modes for the better UI.
- Using **react-razorpay** for the payment integration.
- **Material ui** components are used.
- **framer-motion** is used for handling animations in the website.
- **yup** validations are used as form validation

Winbuks

- It is the largest community development program designed to gather people across the world who love crypto and blockchain. It is a platform where enthusiasts can connect, collaborate, and grow their knowledge and opportunities in the blockchain space.
- You can earn rewards by inviting friends to join Winbuks.io. Share your unique referral link found in your dashboard. When your referrals sign up and meet the required criteria, you'll receive a bonus.
- Designed a secure, transparent, and decentralized transaction flow leveraging blockchain technology.
- Implemented club-based income models, enabling members to earn collectively through structured group activities.
- Built an interactive user dashboard to track earnings, referrals, and transaction history in real-time.

Responsibilities

- Using **Redux-toolkit** for state management.
- **Minimal UI** is used for UI development and it is a fully responsive and premium bootstrap dashboard template including dark, light themes and RTL modes for the better UI.
- **Material ui** components are used.
- **framer-motion** is used for handling animations in the website.
- **yup** validations are used as form validation

Buildex Stores

- It is the largest e-commerce platform in Oman, operated by the Al Khalili Group, offering a diverse range of over 1,000 products for sale.
- Seamlessly integrated SEO optimization strategies to enhance online visibility, organic traffic, and search engine rankings.
- Developed a customized admin panel for product management, order tracking, and performance analysis.
- Optimized the platform for faster page loading speeds and mobile-friendly browsing.
- Custom coupon and discount management system to drive sales and customer retention.
- Implemented multi-language and multi-currency support to target a broader audience.

Responsibilities

- Using **Redux-toolkit** for state management.
- **Material ui** components are used.
- **framer-motion** is used for handling animations in the website.

E-commerce website

- Develop a robust, scalable platform with an intuitive user interface to ensure seamless navigation, smooth transactions, and a positive shopping experience for customers.
- Implement secure and reliable payment gateways to support multiple payment methods, ensuring safe and hassle-free transactions for users.
- Incorporate advanced features like personalized recommendations, search filters, and realtime inventory management, along with analytics tools to track user behavior, sales performance, and optimize the platform for growth.
- Built with responsive design principles, ensuring seamless navigation across desktop, tablet, and mobile devices.
- Added advanced search filters and category-based navigation for easy product discovery.
